

DIGITAL NST

Fetal Monitors

The paperless NST solution for your EMR

Enhancing the value of your EMR 

Digital NST Studies . . . Finally.

The VM F6™ was developed for the “High risk” pregnancy, but is perfect for any busy OB practice or clinic.

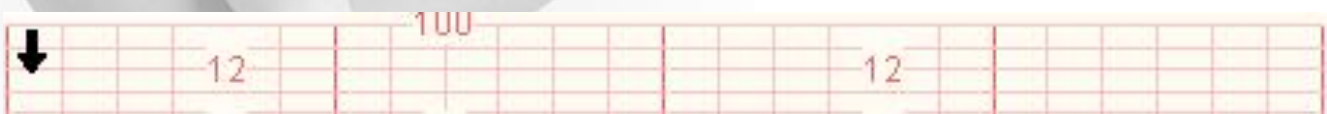

More efficient and affordable than current paper based analog systems.

The VM F6 works for you to enhance and expand your practice services, cut and control your costs and increase practice growth and revenue opportunities.

This light weight, reliable and affordable system helps increase the efficiency of your professional staff time and exam rooms.

- . Link your CTG's to your patient's EMR
- . View your NST studies real-time on any PC or Pentab on your network
- . Annotate, add comments and sign-off . . . digitally
- . No paper, no scanning no filing
