

DIGITAL NST Fetal Monitors

The paperless NST solution for your EMR

Digital NST studies, finally.

The Visual MED VM F6 was designed for the high-risk pregnancy, but is perfect for any busy OB practice. It is more efficient and affordable than current paper-based analog NST systems.

The VM F6 works for you to enhance and expand your services, cut and control your costs, and increase your practice profitability.

This light-weight and durable system helps improve the efficiency of your professional staff time and exam rooms.

- View your NST studies real time on any PC or laptop on your network
- Link you NST studies to your patient's EMR
- Annotate and add comments remotely
- No paper, no scanning, no filing, no wasted staff time
